APPLICATION NO. JP 60-048541

Abstract:

Purpose: To execute efficiently writing to a peripheral storage device of a control table by constituting a titled system so that writing of the control table related to a job is executed in accordance with a policy of recovery of an electronic computer center and a degree of importance of the job.

Constitution: The titled system is constituted so that a recovery instructing value (a) of a center can be designated by an initializing parameter, etc. of a system, and also at every job, a recovery instructing value (b) of its job can be designated by a job control sentence. Also, a degree of unnecessary of recovery C_i is determined in advance so as to correspond to a processing step. An operating system 2 calls a write processing 4 whenever a job control table existing on a main storage device is changed. The write processing part 4 compares the degree of unnecessary of recovery C_i of the processing step in that time point, with the recovery instructing value (b) of the job, and only in case of (b) C_i , the job control table on the main storage device is written to a peripheral storage device.

Respectfully submitted,
